NEW AGE SKILLSET-

Our program is focused to make the student Industry Ready. We teach new-age skills required by companies.

Advanced Excel is a must-have skill in the industry used for solving calculations, managing data, and accounting.

Statistics is a fundamental tool of data scientists, who are expected to gather and analyze large amounts of structured and unstructured data and report on their findings.

Soft skills is most important aspects to convey your approach to different stockholders reading analytical finding which will improve your confidence and help employees to get to new heights in organization.

Power BI is the most adopted cloud-based analysis service that provides rapid insight and is used to extract and visualize data

Python is an open-source language that offers different libraries for manipulating, processing, cleaning, and crunching datasets.

Structured Query Language (SQL) is a type of non-relational database used to store data in form of files, granting us scalability and flexibility.
